## nsyilxcan Trail Markers

Did you know, nsyilxcən (n-see-yeel-x-sen) is the language of the syilx/Okanagan people? Many parks and trails on the Westside have trail markers that feature nsyilxcon language as well as stories about the plants and animals that inhabit the area. Stories are an important part of knowledge sharing in the syilx/Okanagan community as nsyilxcən is traditionally oral in its entirety.

When hiking on the Westside, make sure you stop at the trail markers to learn more about the people who have inhabited these lands since time immemorial.

#### Killdeer Charadrius vociferus

Its 'broken wing' act lures intruders away from its nest.

#### Merlin Falco columbarius

Small falcon that feeds on small birds, capturing them in mid-air.

#### **Bullock's Oriole** Icterus bullockii

The male sings to defend its nesting territory.

## Birds to Watch For

Over 240 species of birds have been identified on the Greater Westside (West Kelowna & Westbank First Nation) by local bird watchers, with some being more common than others. The best time of year to spot birds is when they are migrating (March - May and Sept - Oct), as this is when you will see a greater variety of species. Birds can be spotted year round in the community.

Scan the QR Code and you will be taken to our website where we have a complete list of birds that have been spotted on the Westside, as well as, information on which birds you can see in each season.

# Species that have been spotted
